

Guidelines for Poster Presentation

Posters have become an increasingly popular method for presentation at conferences/workshops, as they promote greater interaction between researchers and conference participants. The purpose of the workshop poster presentation sessions is to showcase the scientific work of students and young researchers.

Submission and Registration

- The poster presentations can be made in a group of maximum four members.
- A presenter must be author/co-author of the research work.
- It is highly desirable and recommended to submit 3-4 pages short paper (.pdf file) in LNCS springer template through Microsoft CMT portal <https://cmt3.research.microsoft.com/ihci2025> by selecting the track **WACIIS2025** up to **August 20, 2025**.
- If there are more than one authors/presenters of the poster, the paper shall be submitted only once by one of the presenters.
- You will receive an acceptance letter on the email address provided while submitting the paper.
- Each poster needs to be registered and fill the [registration form](#) for the workshop by **August 25, 2025**.
- Awards will be given to three best posters including a few “special recognition” categories.
- Extended and revised versions of recommended posters may be considered for publication in the [IHCI-2025](#) conference with submission deadline September 15, 2025.
- Non-author participants (only attendees) can fill in the [registration form](#) without any registration fee.
- The certificates will be provided to all the participants (poster/non-author).

Specifications for Poster Presentations

- The recommended poster size is 3×2 feet (36 inches by 24 inches).
- Use appropriate font and size so that viewers should be able to scan material quickly.
- Divide the poster into columns (3-5 across, depending on contents).
- Poster should include paper title with all authors' names, credentials, affiliations, and email address at the top of the poster.
- Use headings to identify sections. Suggestive headings are:
 - Introduction- A brief introduction
 - Goals/ hypothesis/ statement of the problem
 - Methods/ model/ experimental detail
 - Results
 - Conclusions
 - References

Tips for Poster Preparation

A poster is not an enlarged journal article. Be brief, concise, and don't overwhelm viewers with too much information. Therefore, keep text to a minimum, emphasize graphics, and make sure every item included in your poster is necessary.

- Make sure ideas flow logically from one section to the next.
- Use short sentences or bullet text.
- Use charts and graphs to illustrate data (avoid large tables of raw data).
- Use high resolution photographs (web images often will not work).
- Do not use all capital letters except for headings.
